SERAY YAVUZ

Seray Yavuz

Interior Architect&Designer

About me

I'm Seray Yavuz, an interior architect passionate about designing spaces that blend function, emotion, and aesthetics. I believe every environment has the potential to tell a story, and I strive to create timeless interiors that connect people to space in meaningful ways.

CONCRETE HOUSE

INDIVIDUAL PROJECT

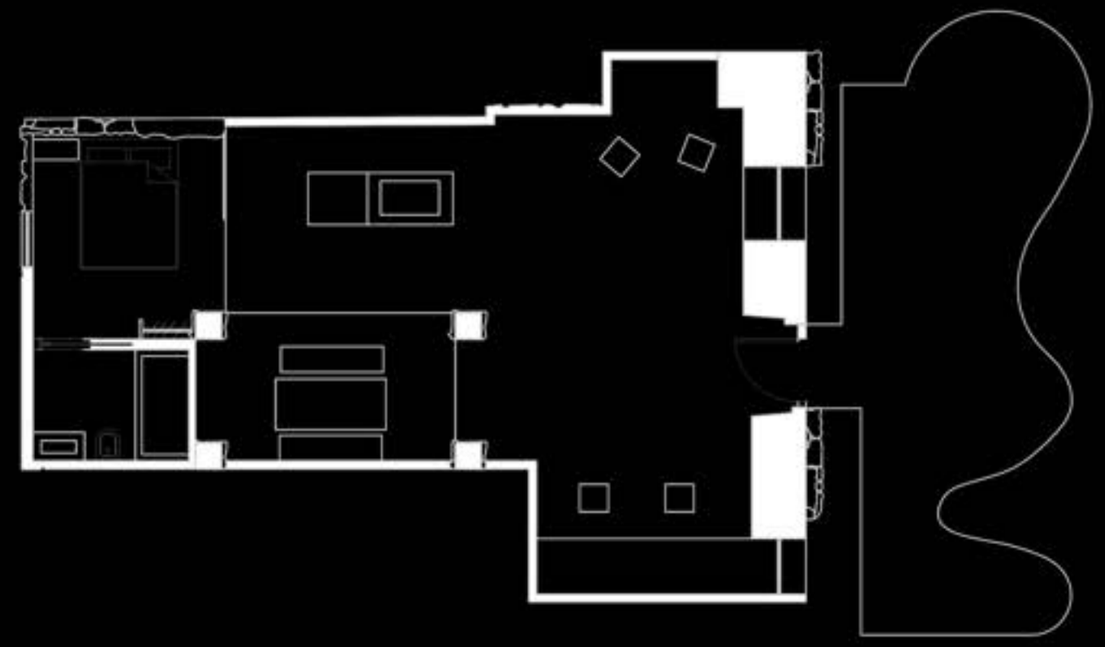

2023

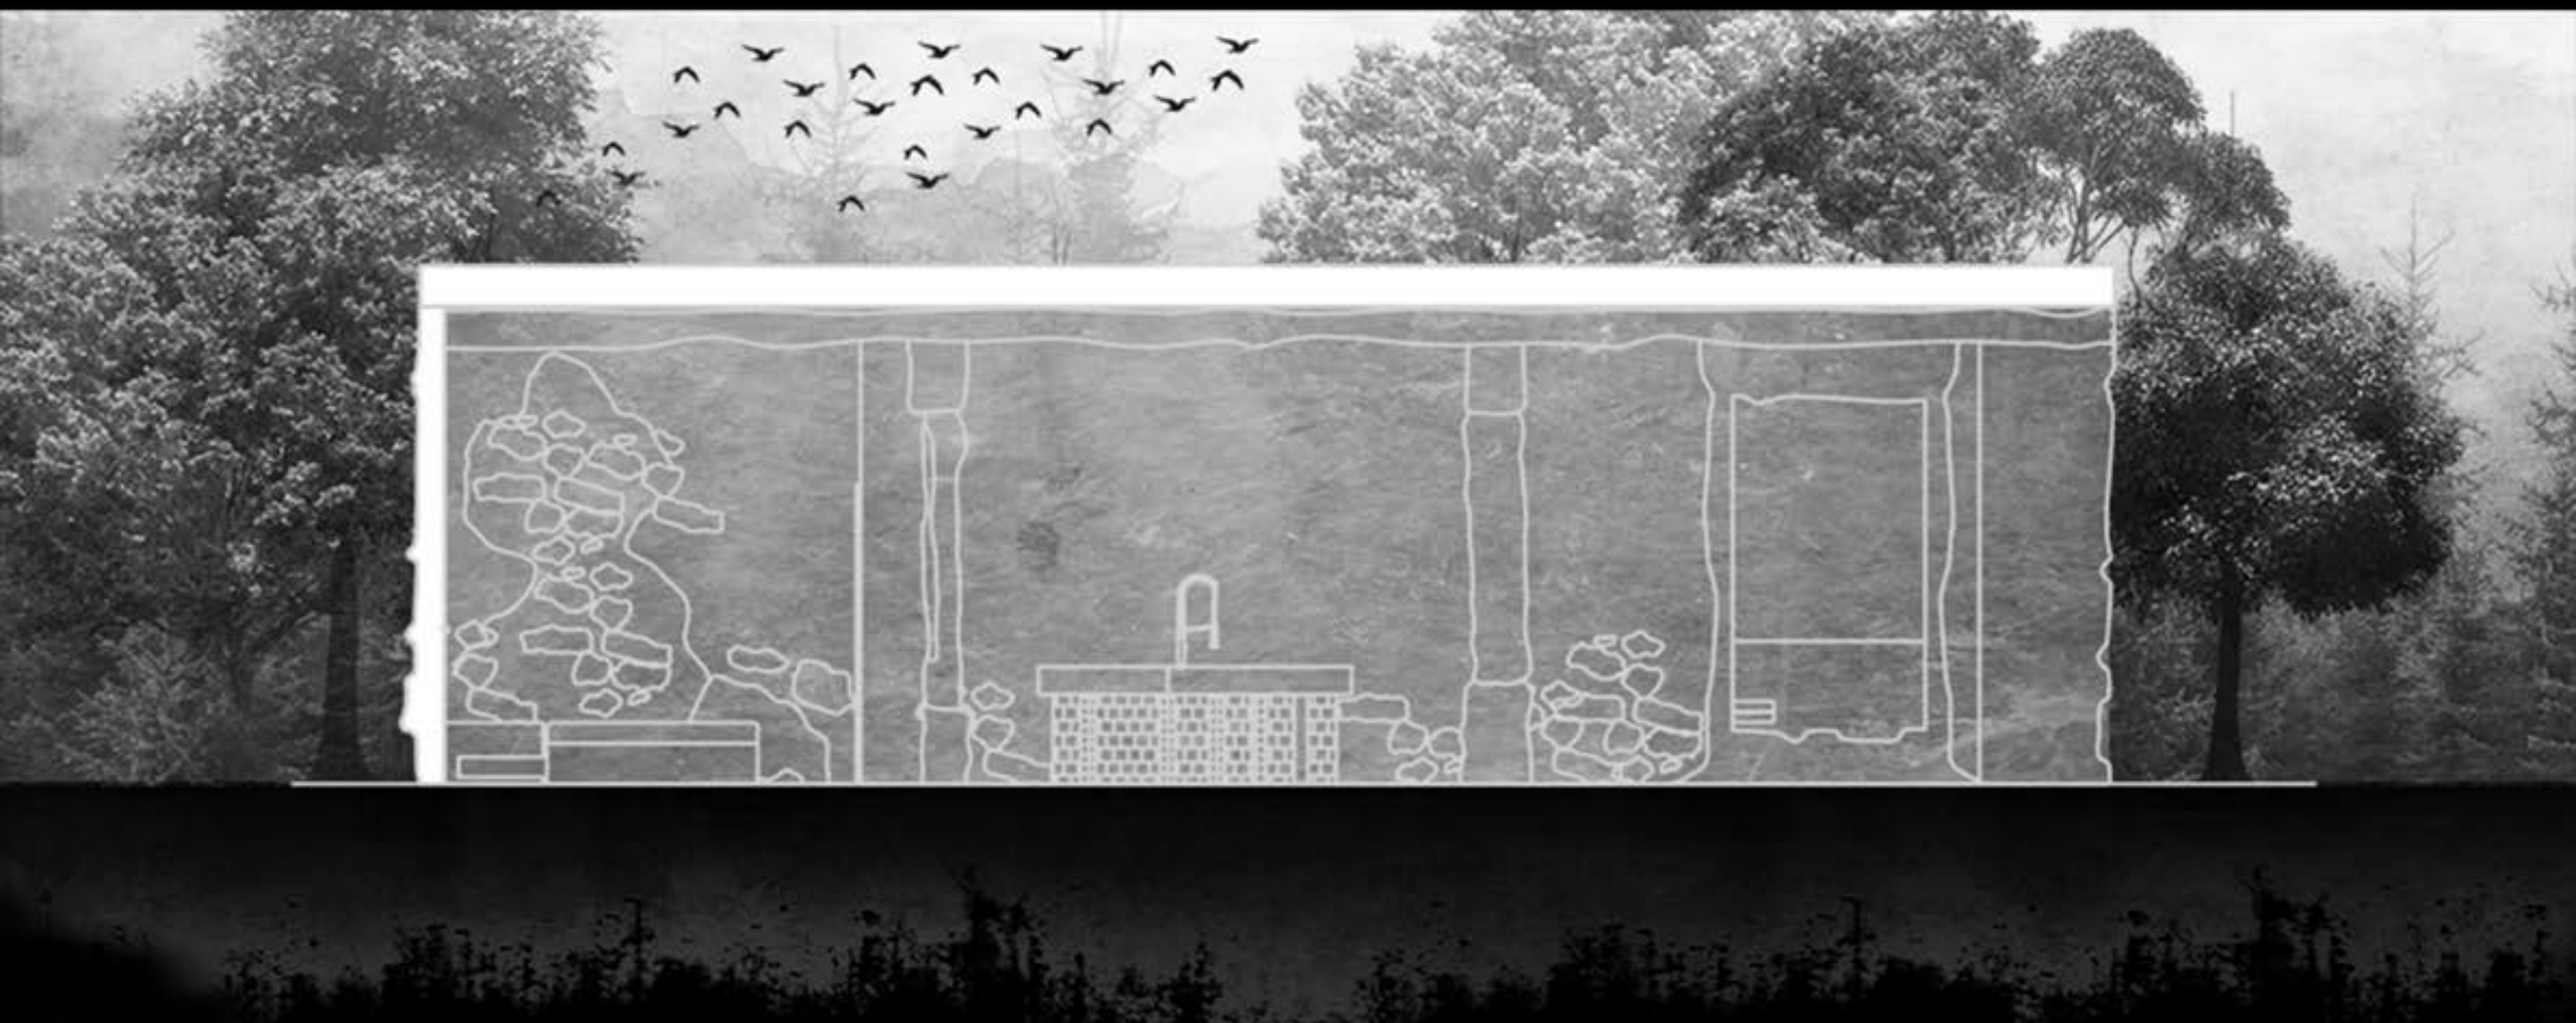

This project is located in a small village in Mugla, Turkey, and its main goal is to provide a sense of isolation in nature. What makes this house unique is its thick stone walls and symmetrical angles, which allow natural light to enter. This single-story house combines traditional Turkish village house elements with modern features. All the rooms in the house are connected, except for the bedroom, which is seperated by a glass partition. The materials used include concrete to maintain a modern look and wood to create a balanced contrast. The exterior garden is designed with a curved, colorful concrete platform that complements the existing vegetation.

01

OSTELLO TASSO

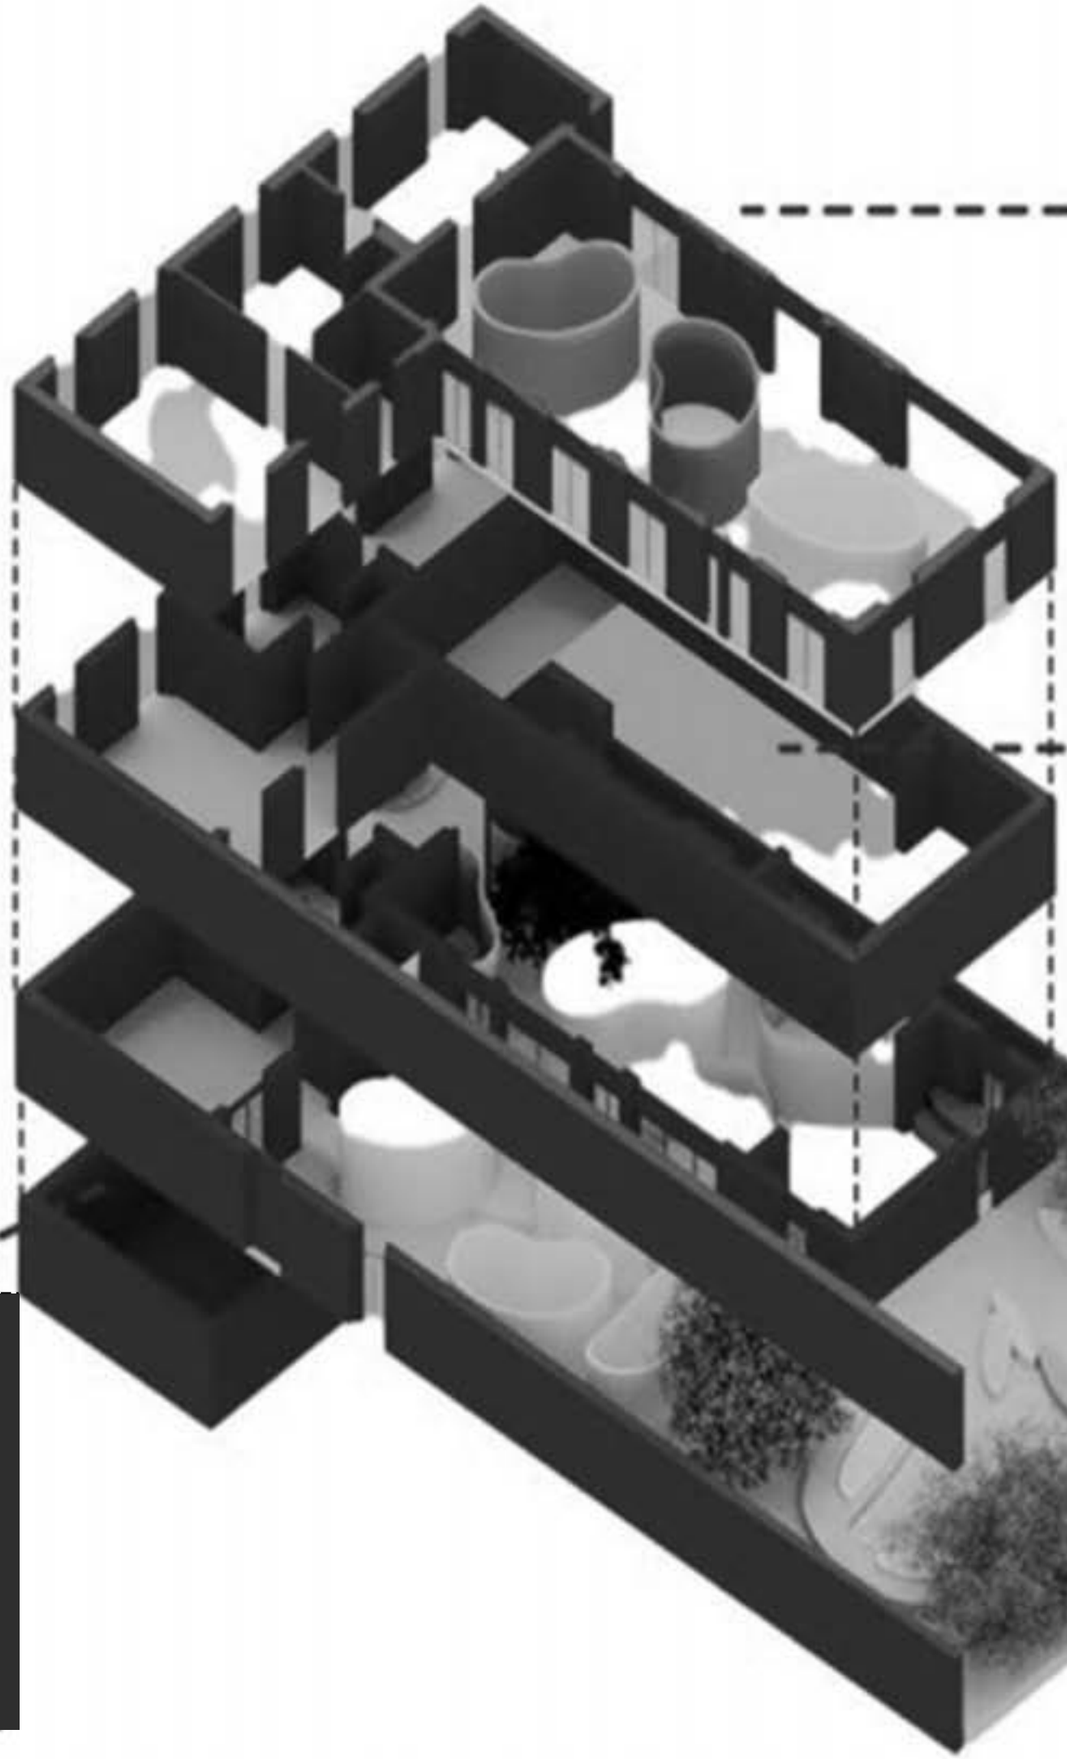

SCHOOL PROJECT
2024

The Ostello Tasso organic flow workspace is a co-working concept located in Florence, blending sustainability and creativity to foster a vibrant, collaborative environment, rooted in eco-consciousness, it integrates green architecture, recycled materials and biophilic design elements like lush greenery and natumental well-being and productivity.

The project also emphasizes multifunctionality, incorporating event spaces, workspaces and accommodation, which broadens its community appeal and revenue opportunities. Sustainable features, energy-efficient systems, and material choices align with modern environmental values, establishing ing hub for creative professionals and environmentally conscious users.

03

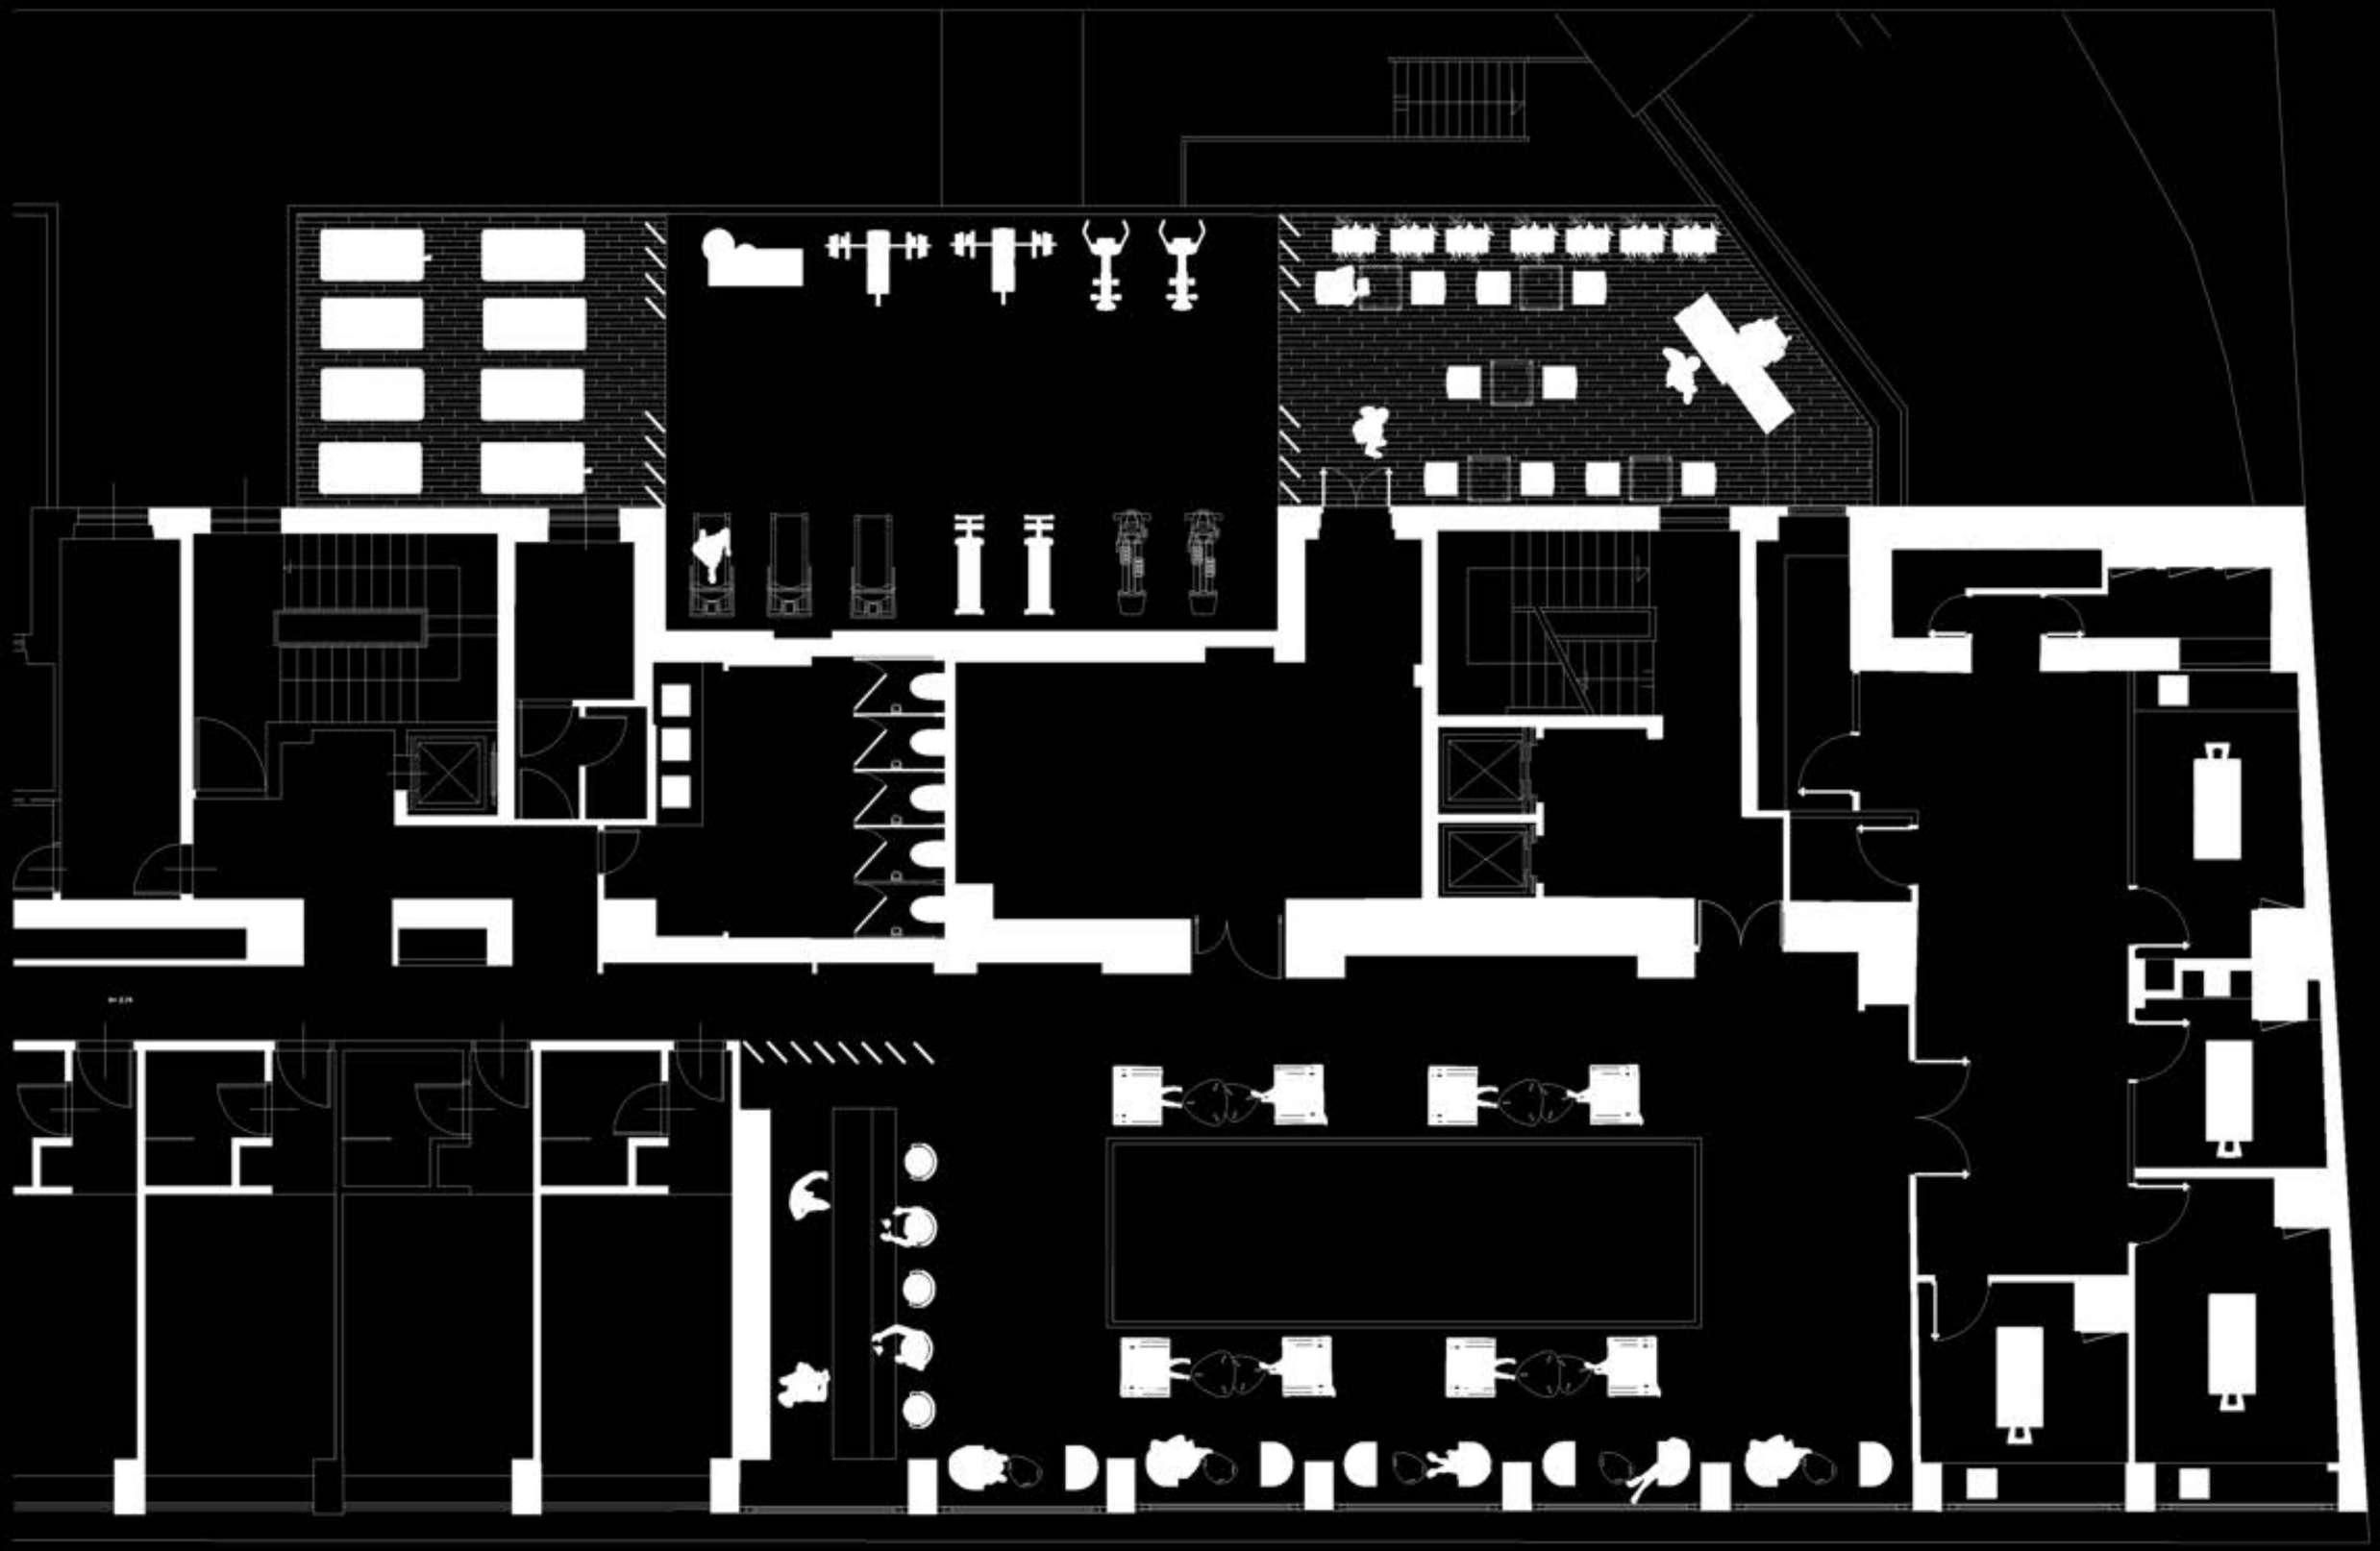

The design is a hotel where light, shadow and reflection shape an immersive, everchanging atmosphere. Inspired by Florence’s Renaissance masters-who used CHIAROSCURO(The interplay of light and dark) to create depth. This concept transforms Hotel Ambasciatori into a living artwork.

+Directly opposite Santa Maria Novella Train Station (SMN), Florence's main transport hub.

+Well-connected to tram lines (T1, T2), providing access to the airport and suburban areas.

S EDITION

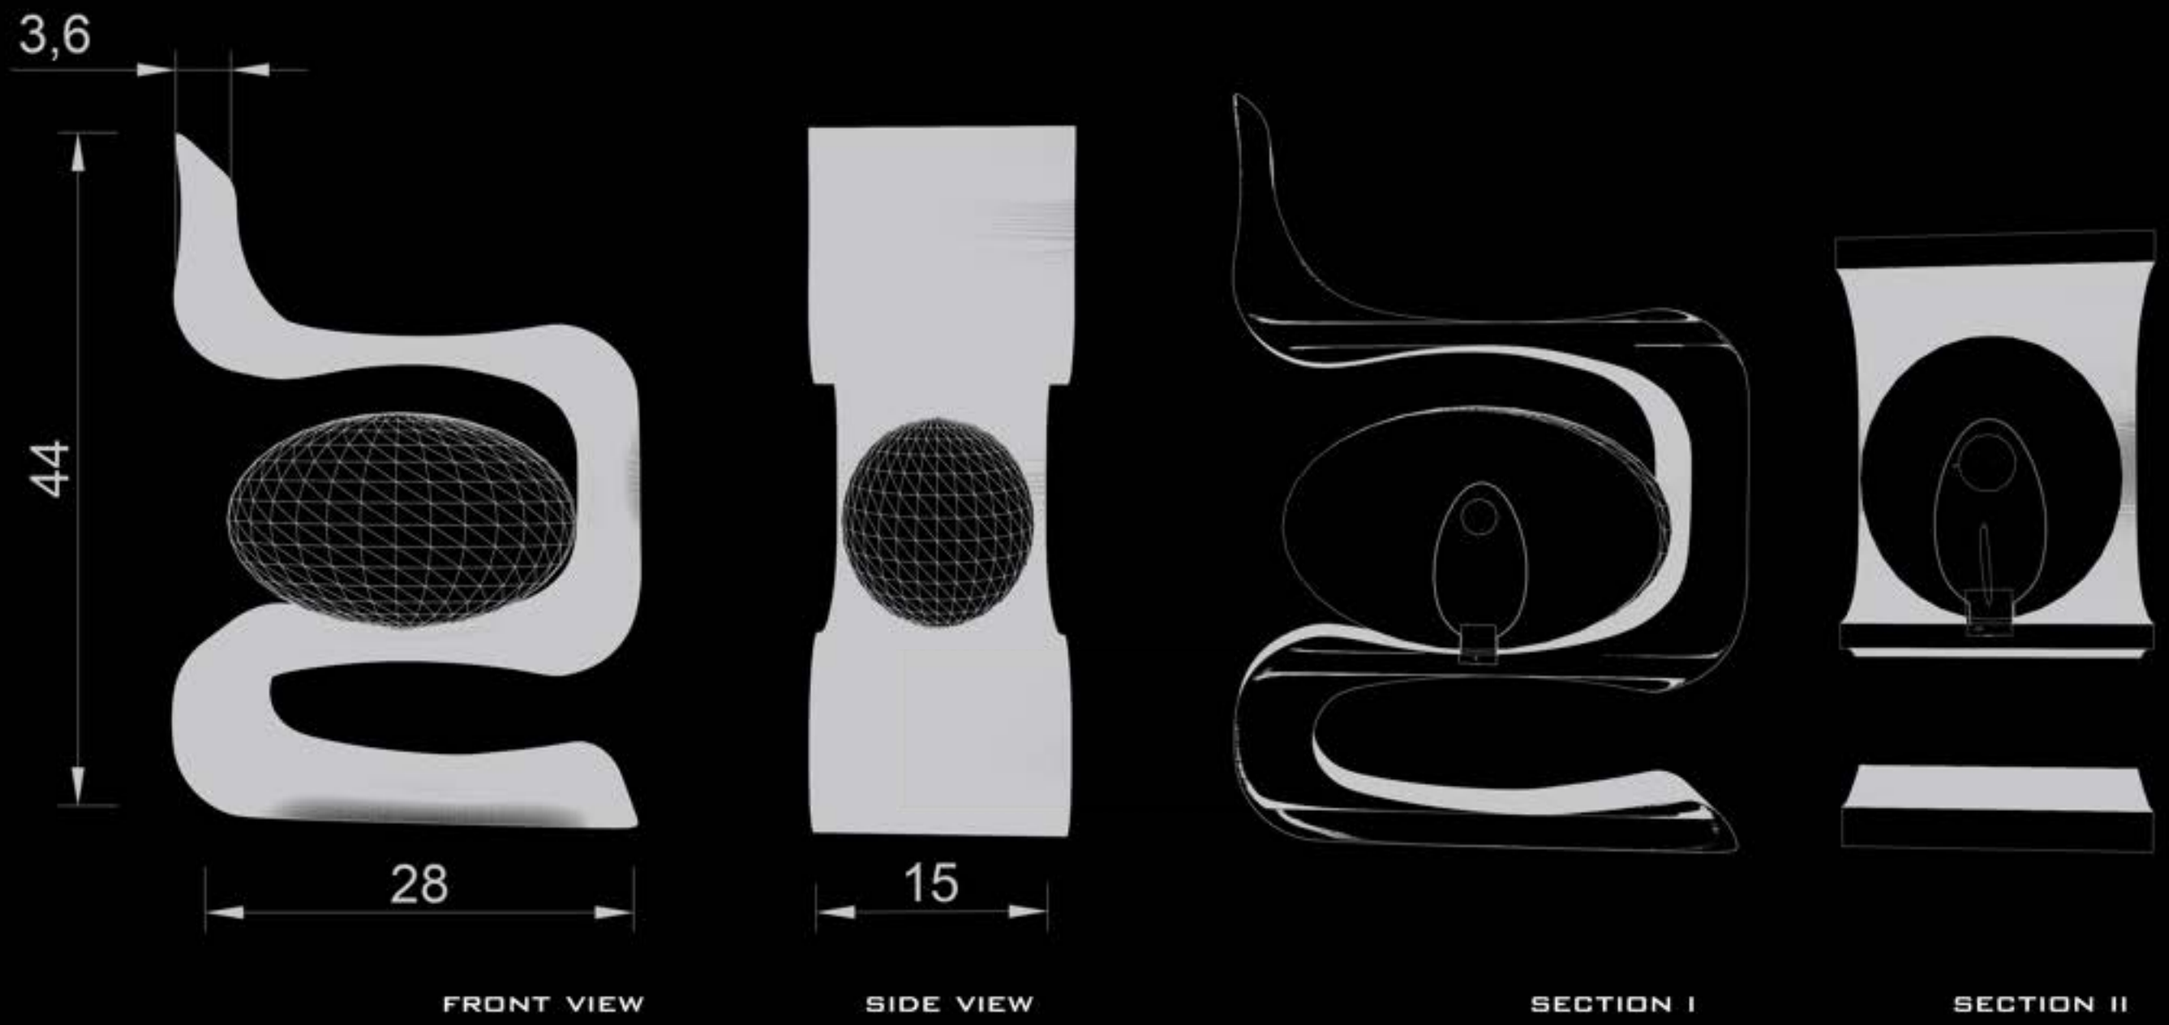

LIGHTING DESIGN PROJECT
2024

The collection combines sculptural form with functionality, using light-weight carbon fiber and LED technology to create efficient, minimal, and expressive lighting pieces. Each lamp features clean lines, monochromatic color schemes with optional red accents, and dimensions suited for modern interiors.
